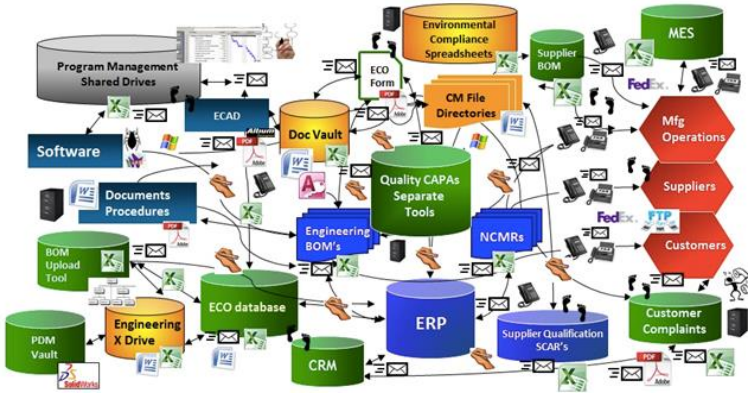
COLLABORATION

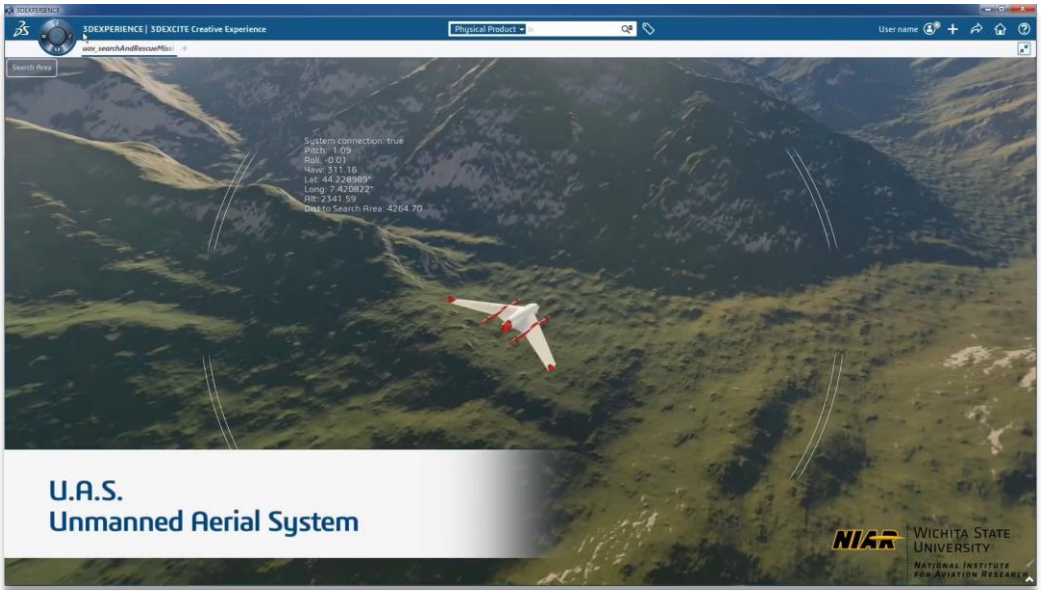
DASSAULT SYSTEMES

TRANSFORMATION 1

Digital continuity is the capability to transfer information throughout the product life cycle. But it is static data processing. Virtual twin is about mirroring the virtual and real world.

From Digital Continuity...





...to Virtual Twins

© Dassault Systèmes | Confidential Information | 10/18/2023 | ref.: 3DS_Document_2022

ENOVIA

TRANSFORMATION 2

In a dispersed value network, sequential processing is not sustainable. Product Development must be experience-, performance- & sustainability-driven.

From Sequential...

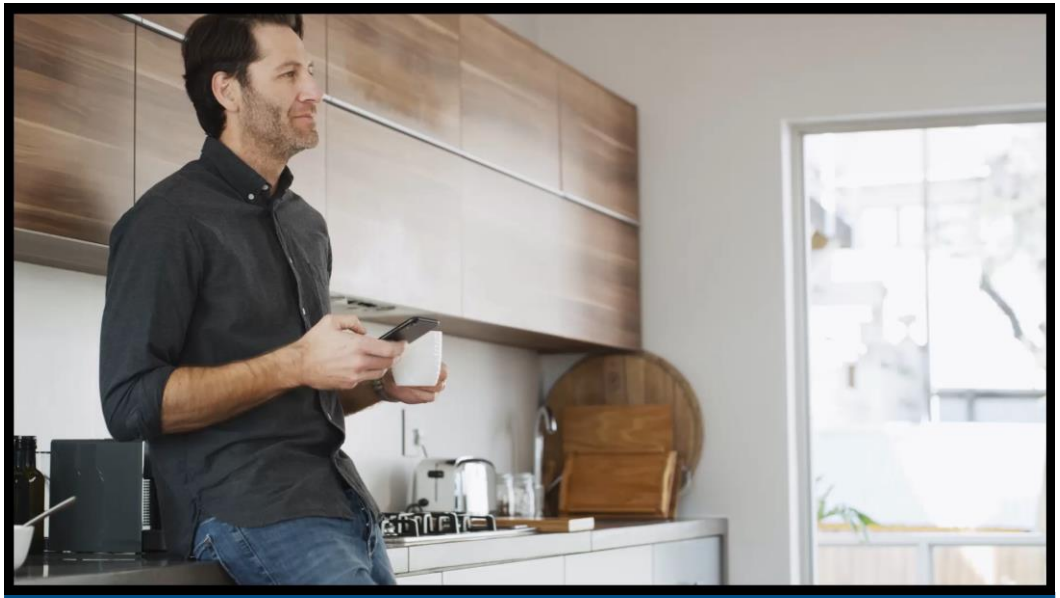
...to DevOps

© Dassault Systèmes | Confidential Information | 10/18/2023 | ref.: 3DS_Document_2022

TRANSFORMATION 3

User expectations have increased. The experience must be mobile, easy to learn and FUN!!

From Desktop…



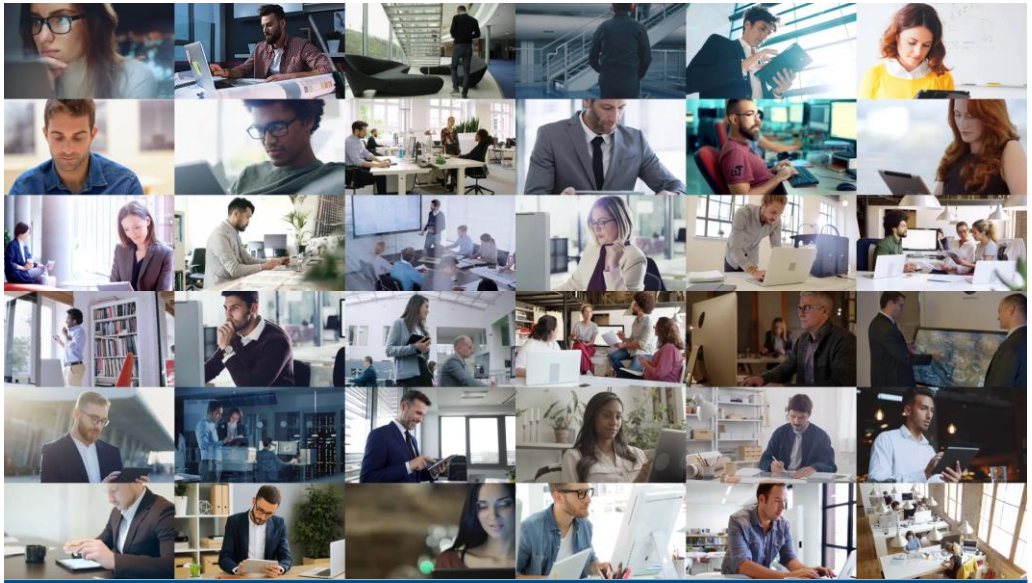
…to Inclusive User Experiences

© Dassault Systèmes | Confidential Information | 10/18/2023 | ref.: 3DS_Document_2022

TRANSFORMATION 4

Multi-discipline teams must break down operational silos and work together in a common environment to drive continuous innovation.

From a patchwork of tools...



...to inclusive Business Experiences

© Dassault Systèmes | Confidential Information | 10/18/2023 | ref.: 3DS_Document_2022

3DEXPERIENCE IS MORE THAN PLM...

"I was really surprised how different **3D**EXPERIENCE is from other PLM systems because **I quickly realized that it is first and foremost a collaboration platform** enabling different functions to work together."

Jose Garcia-Urruchi
Head of Digital Design Engineering, Jaguar Land Rover

"**Social collaboration is the power of companies**. Because that's where all our ideas are going to become reality when we ramp up projects. Back in the day, we were running all these activities in a completely disconnected environment... we thought why? We can collect everything in one single place that can become a source of truth for everybody."

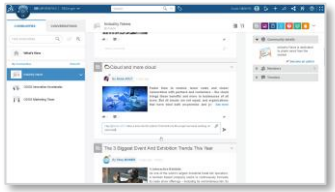
Luigi Ferracutti
Sr Director 3D Development & Tooling , Crocs

© Dassault Systèmes | Confidential Information | 10/18/2023 | ref.: 3DS_Document_2022

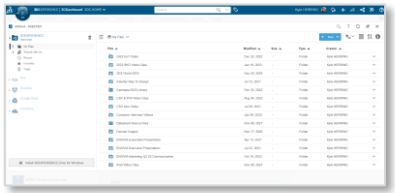
3DEXPERIENCE PLATFORM: CORE ROLES

3DSwymer — **Collaborative Industry Innovator**

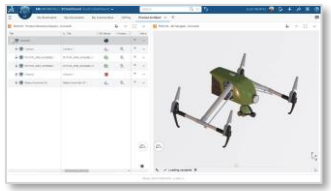
Social Collaboration — Structured Collaboration



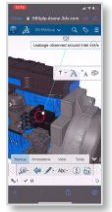
Establish social communities and conversations



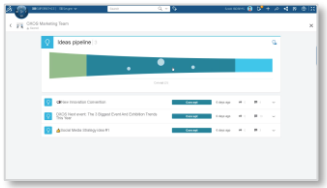
Flexibly organize content and share experiences



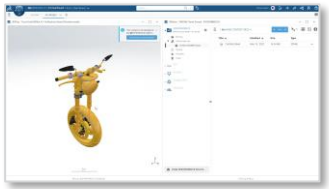
Single, unified engineering definition



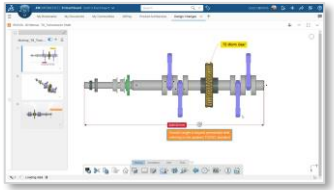
Navigate product structures at any time, on any device



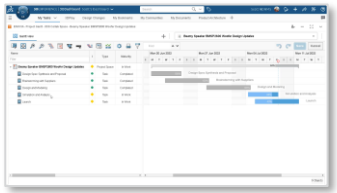
Capture knowledge and know throughout the innovation process



Make accurate decisions based on current data



Review and validate current 3D designs



Standardize project execution and change management processes

© Dassault Systèmes | Confidential Information | 10/18/2023 | ref.: 3DS_Document_2021

3DSWYMER

Unite everyone in the value network for sustainable innovation

- Establish social communities and conversations to share, experiment and collaborate
- Flexibly organize content and share experiences
- Capture knowledge and know how
- Easily store, share and search information for reuse

3DSwym
Engage in communities and conversations

3DDashboard
Customize the display of apps and information

3DSearch
Intuitively search across platform apps and data

3DDrive
Securely store, access and share files

3DSketch
Sketch the world you live in

3DPlay
Experience 2D and 3D content in real-time

- NEW APPS -

3DSwym IOS & Android App
Stay connected to 3DSwym on your phone

3DWhiteboard
Contribute to collaborative ideation and innovation

Channel
Follow identified topics and sources in a single view

© Dassault Systèmes | Confidential Information | 10/18/2023 | ref.: 3DS_Document_2021

COLLABORATIVE INDUSTRY INNOVATOR

Organize, manage and collaborate on content in a secure manner

- Navigate through product structures at **any device**
- Review and validate current **3D designs**
- Contribute to engineering definition in **real-time**
- **Standardize** project execution and change management processes

Change Execution
View and work on assigned changes (CO/CR)

Issue Management
Create, assign and manage issues

3DMarkup
Explore, annotate, section and measure 3D models

Bookmark Editor
Logically organize data and PLM objects in folders

Document Management
Create, search and manage engineering documents

Collaborative Tasks
Simple and intuitive task management

Route Management
Create repeatable routes to help members complete tasks

Collaboration for Microsoft
Manage MS Office documents and capture information

Compare
Identify differences between structures, data and geometry

IP Classify and Reuse
Store, manage and access files across apps

PLANNING

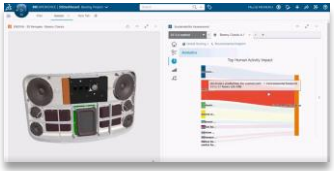
From Enterprise to Value Network Planning

Intelligently plan products and services aligned with business strategy to capitalize on market opportunities.

ENOVIA + NETVIBES

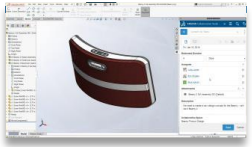
Define a Sustainable Strategy

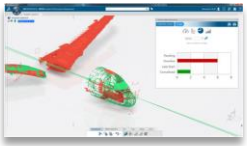
Rethink sustainability as a constraint to a competitive advantage and industry as the solution for a sustainable world.



Portfolio Driven Product Development Planning

Connect Portfolio Definition to Product Development Project execution and review in context of the product definition.





Scalable & Industry Tailored Planning

Planning that meets the unique industry needs.

Value Network Capital Project

Large Enterprise Project

Team Project

Data Driven Quality and Compliance

Move from document based to data & knowledge driven governance (Quality, Regulation, Compliance and Export Control).

Ferrit

Ferrit is a mining equipment specialist that develops complex, cost-efficient transportation solutions for material and personnel.

"Project management is one of the core processes being implemented. Using the management dashboard, we can track all project statuses and KPIs in real-time to support quick and effective decision making."

Martin Kopecek, IT Manager, Ferrit

Challenge

Mining is one of the most energy intensive industries in the world. Ferrit sought a way to radically transform operations and identify more sustainable revenue streams. To do this they embarked on a digital transformation journey to boost its competitive edge and operate more nimbly.

Solution

With the 3DEXPERIENCE platform, Ferrit has digitized their product lifecycle management (PLM) solution

Benefits

By easing access to data and reducing manual data entry, Ferrit expects to improve productivity of PLM users by 10% while simultaneously increasing the accuracy of BOMs. This also allows for future gains from streamlining production from purchasing to production, service and maintenance.

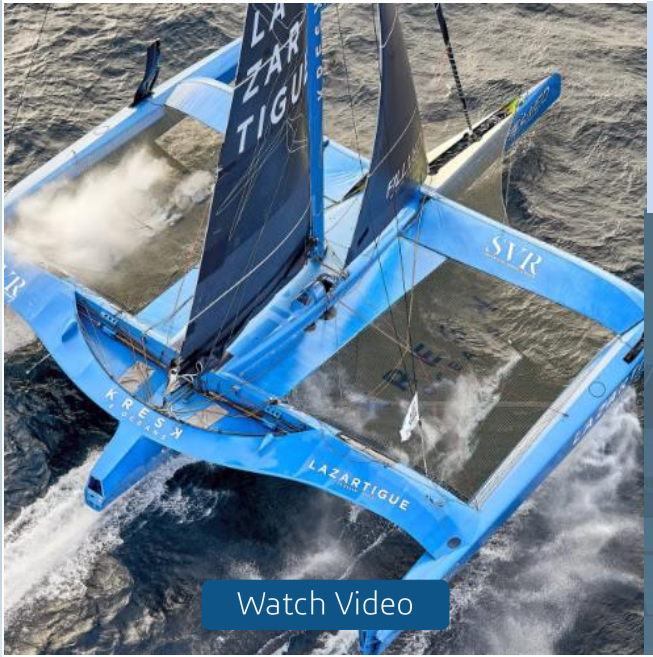
MerConcept

Innovative by nature, MerConcept pushes the limits of ocean racing by harnessing the aerodynamic power of the SVR-Lazartigue.



"Using ENOVIA, the construction and design phase is as smooth as it can be, and that we can support effective information sharing among all the different parties."

Thomas Normand, CEO, MerConcept

Challenge

With more than 150 external collaborations, MerConcept had to keep everyone up to date with progress and ensure they were all working on the latest version.

Solution

With multiple people working on the design at any one time, ENOVIA helps to ensure that technical modifications are correctly implemented, and all affected stakeholders are notified.

Benefits

Collaborating on a virtual twin provides a common data environment, where everyone can work together on the same 3D model – so that everyone can see what has been done, and avoid interference issues.

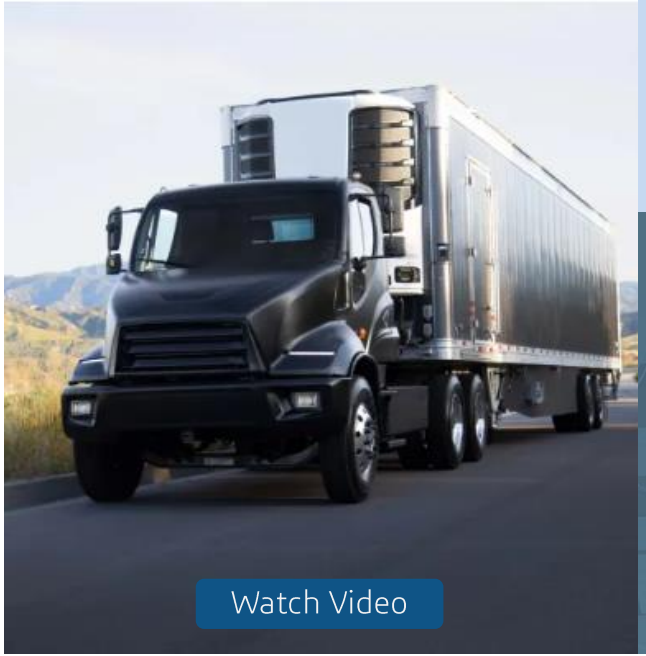
Xos

Xos is on a mission to decarbonize commercial transportation and facilitate fleet owners' seamless transition from traditional internal combustion engines to 100% battery-electric.



"We manage innovation with our value network by being collaborative, so we really appreciate the ability to interface with everyone quickly in an efficient way that's not through email."

Dakota Semler, CEO, Xos

Challenge

The demand for Xos products and services is high. They need to work closely and securely with its value network. Disparate systems put them at risk for making mistakes. Xox needed a powerful technology platform to collaborate with their value network and keep all its product development processes in one place.

Solution

ENOVIA on the **3D**EXPERIENCE platform allows efficient collaboration with the value network by seamlessly adding them to environments and giving them secure access to the data they need.

Benefits

Being on the cloud offers seamless interoperability across the value network. This allows XOS partners from across time zones to come together around projects and drive much greater levels of productivity than what was available in traditional CAD environments.

COLLABORATION AND INTELLIGENCE

From Specialized Business Users to People in Business

Digitally connect all users in the value stream for sustainable innovation.

3DEXPERIENCE®

Inclusive Collaboration

Ensure everyone in business securely collaborates to drive business innovation – move from documents to knowledge and know-how capture and capitalization.

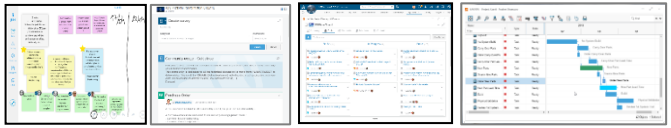
Structured Collaboration

Enable project planning for all, document and product lifecycle management to improve productivity, quality and reduce costs.

People-centric Flexible Planning to Foster Innovation

Inclusive and collaborative planning combining structured and unstructured. People role & skills driven assisted planning.

UNSTRUCTURED ← → STRUCTURED



360° intelligence

Information Intelligence driven contextual decision support leveraging holistic insight (marketing, financial, quality, technical, operation).

Familia Torres

A five generations old Spanish wine producer.

*"With the **3D**EXPERIENCE platform, […] **we've halved the time it takes to approve projects**."*

Francesc Gómez Montenegro, Chief Operating Officer, Familia Torres

Challenge

Familia Torres is renowned for combining tradition and innovation. The Spanish wine producer has more than 24 different brands on the global market. It needed a powerful platform to bring together its product development activities and empower it to manage its growing project portfolio more effectively.

Solution

The company implemented *Perfect Package* on the **3D**EXPERIENCE platform on cloud to transform the way it manages projects, documents and the digital approval process of its packaging.

Benefits

With ENOVIA's project management tools, Familia Torres has halved the time it takes to approve projects. Effective communication, seamless information sharing and total visibility of every step of the product development process has helped to reduce rework and late-stage changes, and speed up time to market.
