INTRODUCTION

Across industries and sectors, businesses are finding themselves with more to do and fewer resources. With increasing costs, changes in licensing arrangements, and budget challenges, it might be time to reexamine your current processes and tools, and find the best CAD solution to support your organization.

DraftSight Enterprise and DraftSight Enterprise Plus are solutions developed for organizations that need the power of DraftSight 2D CAD (Enterprise) or 2D/3D CAD (Enterprise Plus) as well as network licensing and deployment for multiple users or sites.

DraftSight has been on the market for over ten years under SOLIDWORKS, a world leader in design and engineering software, and has won the trust of millions of users worldwide. DraftSight was brought to the market because for every seat of 3D CAD, there are between four and ten seats of 2D CAD in the organization supporting the same mission. In the DraftSight portfolio, Enterprise and Enterprise Plus with network licensing are specific to the needs of organizations. DraftSight Enterprise and Enterprise Plus also offer integration with the SOLIDWORKS® ecosystem.

If you are considering transitioning your team to DraftSight, one of your biggest requirements is probably maintaining productivity. With DraftSight's familiar user interface and common commands, your team will be acclimated in hours, not days. To make it easier to adopt, your existing Dynamic Blocks, customizations, keyboard shortcuts, LISP routines and Script files will all work just fine. DraftSight Enterprise and Enterprise Plus come with full technical support and assistance from your SOLIDWORKS reseller to help your teams be successful and productive.

DraftSight Enterprise and Enterprise Plus are designed to support the needs of organizations with multiple users and sites.

Here are a few of the top benefits of DraftSight Enterprise and Enterprise Plus:

1. Network licensing
2. Support and deployment
3. Interoperability
4. Choice of products
5. Cost savings

CONCLUSION

NETWORK LICENSING

Was your organization left high and dry when other CAD vendors took the flexibility of using a network license away from you? That's where DraftSight Enterprise and Enterprise Plus come into play. If your organization has multiple CAD users, or multiple sites, you'll appreciate having options to work efficiently. DraftSight offers the flexibility of network licenses locally, regionally, or globally. Network licenses are designed for easy installation in a network environment and are suitable for large-scale deployment.

CONCLUSION

INTEROPERABILITY

DraftSight Enterprise and Enterprise Plus integrate seamlessly with other Dassault Systèmes and SOLIDWORKS solutions and services. Many SOLIDWORKS customers appreciate DraftSight's compatibility with the SOLIDWORKS design environment.

You can connect to SOLIDWORKS PDM and the 3DEXPERIENCE platform for real-time collaboration and seamless data management or send your project for rendering, simulation, or analysis.

"DraftSight provides greater flexibility in licensing and directly integrates with our SOLIDWORKS PDM Professional product data management system," - J. Tyler Thomson, VP Operations, Young Industries.

CONCLUSION

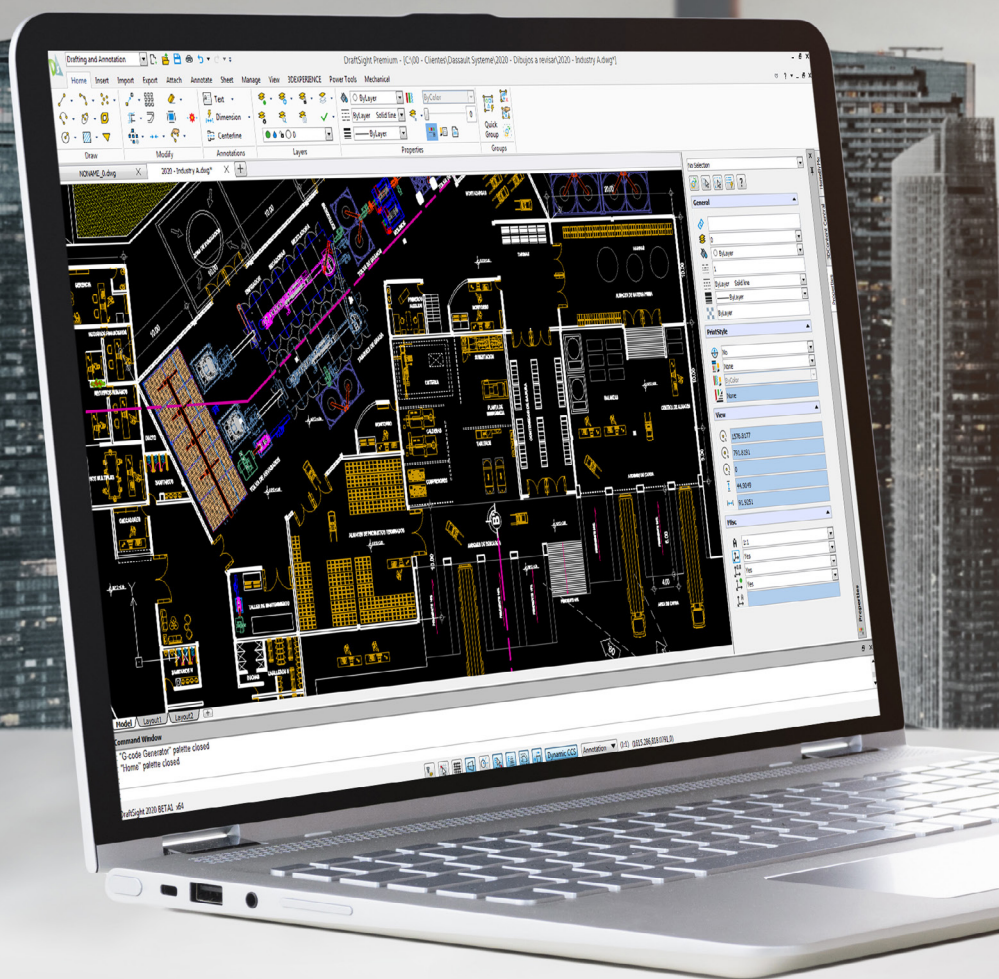

CHOICE OF PRODUCTS

Having a choice of DraftSight Enterprise products helps you find the best CAD solution for your needs, at the best value. DraftSight Enterprise and Enterprise Plus are the Network Licensing-enabled versions of DraftSight Professional and DraftSight Premium. They enable easy installation and deployment in a network environment, suitable for large-scale use.

DraftSight Enterprise is a powerful 2D drafting solution with time-saving functionalities and API access to quickly and easily bring your designs to life, along with network licensing, deployment, and full technical support.

DraftSight Enterprise Plus includes all the capabilities in DraftSight Enterprise, with the addition of 3D DWG file-based design and 2D parametric constraints to effortlessly go from 2D drafting to 3D modeling within the same environment. Send your designs downstream for use in prototyping or manufacturing. DraftSight laser cutting/3D printing options.

DraftSight Enterprise and Enterprise Plus also have a higher level of support and a deployment wizard so you can customize your installation parameters across your entire user base.

COST SAVINGS

DraftSight Enterprise and Enterprise Plus can be purchased through your local SOLIDWORKS reseller and are easy to implement, thanks to full technical support and a deployment wizard. DISCOVER DRAFTSIGHT

One reason DraftSight has become one of the top five CAD products (by seat count) is that when it comes to drawing technology, one size does not fit all. DraftSight Enterprise and Enterprise Plus provide comparable, if not greater, capabilities than alternative CAD products with the flexibility of network licensing and support for organizations.

So, let's consider your opportunity. World-class CAD with robust 2D drafting and choice of 3D design that still gives you the option to choose network licensing. So why not join the millions who have already chosen DraftSight?
